Aspect ratio Length Bright Glued

Concrete Reinforcement

Optimized anchorage

Dramix® 4D provides optimal crack control for standard statically indeterminate concrete structures that are subjected to regular static, fatigue and dynamic loadings with high serviceability requirements.

High performant strength

Dramix® 4D "X" is a high performant fibre with higher tensile strength compared to 4D Premium fibre.

Glue technology for three-dimensional reinforcement

Dramix® steel fibers are bundled with water-soluble glue. The glue helps to avoid fiber balling during mixing and ensures a homogeneous distribution of fibers throughout the concrete mix.
