

Why Dramix[®] ?

**WHAT IF YOU
HAD A MATERIAL
THAT PROVIDED
YOU WITH UNLIMITED
POSSIBILITIES TO
BUILD
AND DEVELOP
YOUR PROJECTS?**

M eet Dramix®, Dramix® is the innovative steel fibre concept from industry specialist Bekaert. With its unique combination of reliability, flexibility and cost-efficiency, Dramix® steel fibre technology has set a new standard for concrete reinforcement.

BENEFITS OF STEEL FIBRE CONCRETE

Steel fibre reinforced concrete offers high ductility and load bearing capacity. On top of that, it is an efficient and cost-effective solution that is quick and easy to apply.

**EXCEPTIONAL
PERFORMANCE
AT AN EXCEPTIONAL
PRICE**

Dramix® allows you to save a significant chunk of your budget, because it removes the need for traditional mesh placing. From now on, you can skip this process and use your time and resources for what really counts: building your project.

**YOU
THINK IT,
YOU
BUILD IT**

Dramix® steel fibres stand out from other products through their ability to make concrete more ductile.

Thanks to an innovative concept of glued fibre bundles, Dramix® is very easy to mix and work with. Even complex forms and structures that you could not imagine doing with other products, are now possible with Dramix®.

Welcome to a new world of possibilities.

**DRAMIX[®],
YOUR PEACE
OF MIND**

Flexibility and cost-efficiency should not be a compromise on quality. With Dramix® steel fibres, you can rest assured that your project is durable and crack resistant. Because that is exactly what your customers expect from you.

Dramix® gives you the reliability that you owe them.

**WHY
BUILDERS
AROUND THE WORLD
ALREADY CHOSE
DRAMIX®?**

Builders and constructors around the world have already chosen Dramix® for a wide range of construction applications.

Why? Because they have been convinced by the power of Dramix® and the value it brings for their daily business.

**IMAGINE
WHAT WE CAN DO
TOGETHER**

Dramix®
