

**NEW**

# TV53 and TV55

better value for money

## Flat tops: TV53 and TV55

for cotton carding in ring spinning applications

### What can we offer you?

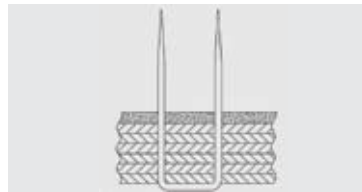

High speed carding flat tops for cotton carding in ring spinning applications

### Extra hardened points combined with a new design

- Optimised gradual setting patterns

- Improved tooth design (tops have sharp side grinding and backing off)

**Features**

**Benefits**

#### Longer lifetime

Longer interval between resharpening

#### Higher sliver quality

Trash is being captured in the lower density zone of the flat top while the fine carding is done in the higher density zone

- Higher nep removal efficiency
- Smooth working without loading

## Why choose Bekaert?

1

### Transformation expert

Thanks to our careful wire rod selection and our expertise in drawing, shaping and punching, Bekaert can offer you a high qualitative card wire.

2

### Independency

Bekaert reinforces its status of independent and recognized leader in the card clothing business through partnerships with textile machine builders and customers world wide.

3

### In-house developed production machinery

Thanks to our in-house developed machinery we can take on any project, no matter how complicated.

4

### 400 international experts at your disposal

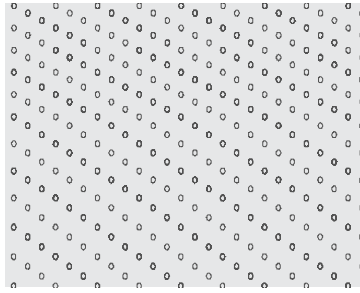

Bekaert's technology centres count over 400 international experts who have the technical know-how and experience to create a card wire that meets your expectations.

5

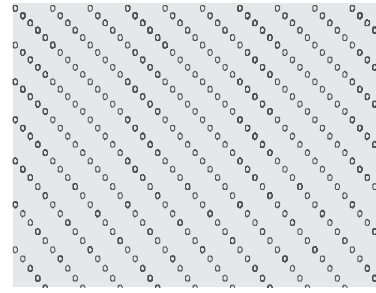

### Global presence

Bekaert is active in more than 120 countries and has more than 22,000 employees worldwide to guarantee a prompt and customised service.

## Pattern design

**TV53 (exit density 520)**  
for medium counts

**TV55 (exit density 550)**  
for fine counts, for medium counts with the highest quality requirements and for medium and fine counts on high speed cards

## Bekaert's new tops meet high standards of Indian cotton spinners

“

*The development of the new flat tops is a direct result of the thorough technical know-how and the high manufacturing quality that is so typical for the Bekaert organisation. By placing high priority on meeting the market's needs, Indian customers are more and more relying on Bekaert's carding solutions.*

”
