

# Unimech Advanced

## Passport

### What?

“Unimech Advanced” is a redesigned high performing heavy duty mounting equipment for metallic wires for all types of roller cards.

### Properties

- Automatic self adjusting tension control device.
- Can be installed on whatever position on the card.
- Secured wire guiding system, allowing wire mounting from any side of the card.
- Adjustable pre-forming rollers.
- Smooth roller finger.
- Bar up to 6000mm, made from 1000mm sections.
- Electronic adjustable variable speed drive, with two step chain.
- Electronic box: fast responding and light weight.

### Features

- Perfect and consistent wire tension.
- Avoiding wire damage during winding.
- Higher mounting speed.
- Under improved secured conditions.
- Tight wire guiding (no loose wire).
- No bare cylinder damage.
- Reduced downtime in opening and removing machine parts.
- Light overall weight.

### Accessoires

- Wire spool winder and un-winder.
- Soldering unit.
- All types of tension plates (flat, interlocking, etc.).
