

The backbone of a sturdy and competitive wiper design

Why choose Bekaert?

1

Our expertise, your success

Bekaert has more than 130 years of experience in developing and producing coated wires for a wide range of applications. Our profound technical knowledge, state-of-the-art capabilities and drive to always create better wire solutions together with our customer forms a solid foundation for your success.

2

Your strategic partner

Bekaert has manufacturing sites and stocks of finished goods and pre-drawn wire strategically located around the world. This enables us to offer our customers wires of consistent quality and timely deliveries wherever they are situated. Our world-wide and professional sales force is always available to offer you the required service in a highly demanding environment.

Bezinal® Color coated wire

For wiper blades

What can we offer you?

Bekaert wiper blade wire is a cold rolled flat wire with a thin Bezinal® Color coating that is available in all standard dimensions to fit all wiper designs.

Features

- High carbon steel section
- Bezinal® Color coating = A zinc-aluminum coating with a thin polymer layer (averaging 3 µm) with a 'stainless steel look'

Benefits

- Guarantee the performance and durability of your wiper
 - Mechanical properties that are equal to stainless steel
 - Good corrosion and cathodic protection
- Simplify your production process
 - Good formability (Including punching of barbs)
 - No dust formation
- Increase your competitiveness
 - Independence of nickel price fluctuations

Product range

- Patented SAE 1060-1070 Bezinal® Color cold rolled wire
- Tensile strength: 1600 - 1800 N/mm²
- Standard sizes: 2.50 x 0.80 mm (0.098 x 0.031 inch)
2.80 x 0.80 mm (0.110 x 0.031 inch)
- Standard colors: Transparent or black

Other sizes and colors available on request
