* All data without any warranty or liability, due to the textile nature of the product

(1) Weight ISO 3801
(2) SS = stainless steel fibres which can continuously withstand temperatures up to 700°C

Delivery: All fabrics are delivered on cones or spools.
Main usage

Bekaert ropes combine heat resistance and mechanical durability. They are used in a wide variety of applications as covering material for difficult shapes or as fixing material in high temperature ranges.

**BEKAERT Rope BRR3**
these 100% stainless steel ropes combine a high strength and temperature resistance up to 700° C.

**BEKAERT Goldrope BRR5**
these 100% PBO ropes combine a high strength and temperature resistance up to 450° C. They are typically used as covering material for quench rings.

**BEKAERT**

**Bekinox® VN 12/3x1000**
these 100% stainless steel yarns are typically used as sewing yarns for the fixing of our different fabrics.

**Bekinox® VN 12/4x275**
these 100% stainless steel yarns are typically used as sewing yarns for the fixing of our different fabrics.

How can your company benefit from Bekaert heat resistant separation material?

This datasheet explains why Bekaert heat resistant separation material helps you to reduce your total costs. If you want to find out how these high quality fibres, filaments and yarns can work for you too, we are happy to advise.
