

Stucanet® S

Product Data Sheet

General description

Bekaert Stucanet® S is a purpose designed plaster and render carrier manufactured from a galvanised steel welded wire mesh into which a moisture absorbent sheet of chip paper is interwoven.

The chip paper assists with the wet adhesion and curing of the mortar and the perforations allow the mortar to perfectly bond around the steel wires, resulting in firm anchoring of the mortar and high resistance to load and impact.

Stucanet® S has two parallel, round fixing wires.

For further details, please contact us or ask for the Stucanet® application instructions.
