

Stucanet® 80 HG-BM

Product Data Sheet

General description

Bekaert Stucanet® 80 HG-BM is a purpose designed plaster and render carrier manufactured from a heavy galvanised steel welded wire mesh into which a moisture absorbent sheet of chip paper is interwoven.

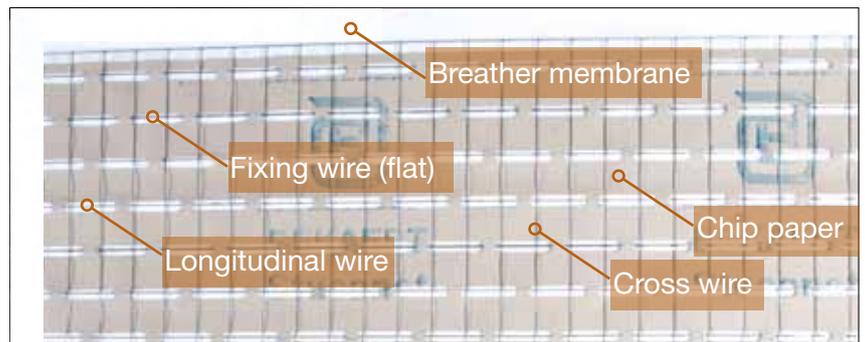

The chip paper assists with the wet adhesion and curing of the mortar and the perforations allow the mortar to perfectly bond around the steel wires, resulting in firm anchoring of the mortar and high resistance to load and impact.

Stucanet® 80 HG-BM has solid flat wires incorporated to increase the stiffness of the panel.

Stucanet® 80 HG-BM is used specifically for exterior facade applications. It has the same wire structure as Stucanet® 80, but is protected with a breather membrane to prevent moisture penetration whilst still allowing the wall to breathe naturally.

For further details, please contact us or ask for the Stucanet® application instructions.

Packaging and packaging units

- Panels are packed in bundles of 15 pieces.
- The bundles are stacked on wooden pallets.
For Stucanet® 80 HG-BM, 8 bundles are stacked per pallet.
- Each bundle has a product label.
