

- **Gabion walls:** Bezinal®5000 Gabion wire solutions

Key trends

- Target to reduce CO₂ - **sustainability, recyclability**
- Further **urbanization** in developing countries
- **Safety/quality/reliability** of the structure = Peace of mind & safety during construction on the job site
- Increasing traffic, higher **safety** requirements

Gabion walls: Bezinal®5000 Gabion wire solutions

Challenges

- When it comes down to constructing infrastructures for public projects, we know how critical it is to have your structure **withstand the test of time**.

Benefits

- **100 years lifetime** in the most demanding environments (C4,C5)
- Excellent **quality** and **optimal processability**
- **100 % recyclability** - circular solution
- **Permanent testing** in changing conditions
- **State-of-the-art**, large production capacity under severe quality control
- Long-time **experience**
- **Short lead times**

Bezinal®5000 Gabion wire solutions

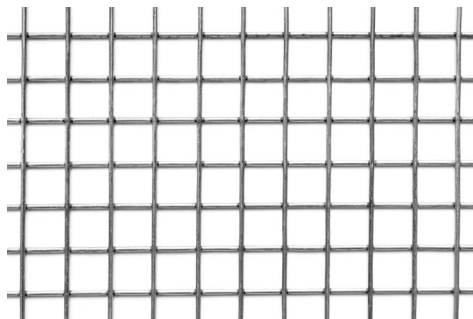

Bezinal®5000 Gabion wire solutions

Product features

- The wire has both high **flexibility and high tensile strength**.
- We offer, zinc-aluminum coating as **Bezinal®5000**, so there is no need for post-galvanization, **saving you both time and money**.

Bezinal®5000 Gabion wire solutions

- regular coating,
- high coating weight,
- consistent mechanical properties,
- permanent internal and external quality control,
- different make ups available
