

Wire solutions for wiper solutions

Vision systems

Key trends in vision systems

- Noise Reduction (especially with EV's), silent wiper
- Aerodynamics and weight reduction (for better range of batteries)
- Aesthetics: The best would be to not even see the wiper
- Sustainable Solutions that lead to a lower CO₂ footprint
- Increased use of sensors
- Demanding windscreens (longer, more curved) which leads to higher requirements for wiper designs
- Reduction of design complexity and more universal and scalable solutions

Because a clear view matters

Efficiency

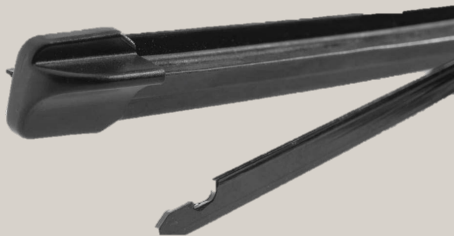

- Excellent Wiping Performance in difficult circumstances
- High precision forming on high speed bending machines
- Superior Quality level, low PPM levels
- Good cost-value ratio, lower TCO

High-performance coating

- Dual layer coating with perfect adhesion
- Excellent deformability and weldability
- Very high corrosion resistance

Global partner

- Standardized production processes
- Global Customer Service and Support
- Established premium Development Partner
- Your partner to achieve net zero

Where can you find our wire solutions?

Contact us

Component	Subcomponent	Bekaert Products
Wiper solutions for front and rear window	Flat blade	Bezoplast® Flat blade
Wiper solutions for front and rear window	Wiper Arm	Bezinal® HiCa and Loca Wiper Arm
Wiper solutions for front and rear window	Wiper Spring	Bezinal® Spring Wire
