# Message from the Chairman and the Chief Executive Officer

## Dear shareholder, Dear reader,

From a financial performance perspective, 2018 was deeply disappointing. The results we posted in 2018 dropped far beyond our goals and reversed our successful margin improvement trend of the past years. The share price has been under continuous stress amid the long series of profit warnings by sector players in our industries and reflects both the weaker Bekaert financial performance in 2018 and rising global economic uncertainty.

Despite softening GDP growth in 2018, induced by trade tensions and other political and economic uncertainties, we achieved 5% consolidated sales growth and our combined sales exceeded the € 5 billion mark for the first time in history. We haven't been able, though, to translate this growth into incremental profit. Underlying EBIT reached € 210 million, representing a margin on sales of 4.9%, and reported EBIT was € 147 million at a margin of 3.4%, far below the levels of previous years.

Some of the negatives of 2018 have been resolved or related to one-time corrections and are not expected to affect our margins in 2019. The performance of Bridon-Bekaert Ropes Group should improve according to the profit restoration plan that has been put in place. We are resolving the start-up issues related to various major expansion programs and our results should no longer be affected by the losses generated in our sawing wire activities or by those incurred in the plants that we have closed in the course of 2018. We regret that our actions to improve our performance included decisions that affected jobs, but they were necessary to help turn the tide from here onwards.

Bekaert has a strong track record of success and we want to return our business performance as quickly as possible to the positive growth path that we set out in our strategy and that we have been achieving until recently.

As we enter 2019, the business conditions in various sectors have begun to trend somewhat lower as a result of tighter markets and postponed investments. Given the market evolutions and the anticipated continued price pressure, we will implement improvement actions that will reduce our cost structure significantly, helping to enhance our competitiveness and improve our financial performance sustainably.

We designed and implemented a new organizational structure in early March 2019. We are making those organizational changes to upgrade our capability and to take out complexity from the organization. This will enable faster decision making, more agility to respond to change, and enhanced ownership to drive performance and customer centricity.

We are confident that our accelerated transformation drive and the improvement actions we are taking, will help us rebuild the underlying EBIT margin to above 7% over the medium term. We will also continue to put in place cash generation actions to reduce our net debt leverage and we intend to bring net debt on underlying EBITDA below 2.5 by the end of 2019.

2018 has not delivered the results you expected from us, nor the goals we set ourselves. The Board of Directors has proposed to the Annual General Meeting of Shareholders of 8 May 2019, a gross dividend of 70 eurocent. In line with the company's dividend policy, the temporary dividend cut reflects the lower earnings and high debt leverage of the company.

We want to thank our customers, partners and shareholders for their continued trust. And we want to thank our employees for their commitment and drive to take on the new challenges and realize our goals.

After 17 years with Bekaert, of which five years in the Chair of the Board, my term has expired at the close of the Annual General Meeting of Shareholders of 8 May 2019. I would like to take this opportunity to wish the new Chairman, the entire Board of Directors, and Matthew Taylor and his team success in getting the company back on the value-driving growth path where it belongs.

**Bert De Graeve**

# **COMPANY**PERFORMANCE

## Global Presence

Bekaert is a truly global company. We are present in all regions where our customers are active, so that we can respond as effectively as possible to their needs. Our wide geographical coverage enables us to identify and respond swiftly to new trends and opportunities. Our diverse range of steel wire products and solutions is used in many sectors. This makes us less sensitive to sector-specific trends and it also benefits our customers, because solutions we develop for customers in one sector often form the basis of innovations in others.

Bekaert serves customers across a multitude of sectors with a unique portfolio of drawn steel wire products, coated to optimally suit the application needs. Bekaert steel wire is used in cars and trucks, in elevators and mines, in tunnels and bridges, at home and in the office, and in machines and offshore. If it drives, ascends, hoists, filters, reinforces, fences or fastens, there is a good chance Bekaert is inside.

## Segment performance in 2018

#### **EMEA**

Bekaert's activities in EMEA achieved almost 5% sales growth in 2018, driven by the aggregate effect of passed-on wire rod price increases and price mix (+6.8%), a small organic volume decline (-0.9%) and the divestment effect of the Solaronics business (-0.9%). Demand from the automotive and construction markets was strong throughout the year, while demand for industrial, specialty, and stainless products softened in the second half of the year.

Underlying EBIT was € 114 million at a margin of 8.5%. The margin performance was lower due to higher than anticipated start-up costs in plants with major expansion programs in Central Europe, and increased price pressure in several markets, particularly those where we compete with integrated players.

Reported EBIT dropped to 5.5% as a result of the one-off impact of the closure of the Figline plant in Italy ( $\in$  -40 million), thereby reflecting the operational losses incurred since the announcement of the closure, the impairment losses of the site's assets and the expenses accrued for the closure.

Capital expenditure (PP&E) amounted to € 67 million and included, amongst other things, capacity expansions in Romania, Slovakia and Russia.

#### North America

In 2018, Bekaert's activities in North America achieved +12% sales growth. The organic sales growth accounted for +16.4% and stemmed from improved volumes (+5.7%) and passed-on higher wire rod prices and other price-mix effects (+10.6%). The adverse currency impact for the year tempered to -4.4% due to the appreciation of the US\$ in the last quarter of 2018.

Automotive demand remained strong throughout the year. The industrial steel wire and agricultural fencing markets were affected by increased price pressure and by the usual seasonal effects in the second half of the year.

Bekaert's rubber reinforcement activities in the US recorded solid growth. The margins were, however, affected by supply chain issues caused by the continuous changes in trade policy, including quota restrictions and tariffs. The rubber reinforcement activities in the US use imported wire rod because the qualities needed to produce the related products are not available in the country. After reaching the volume quota limit on imports from Brazil at the end of July, the cost of imported wire rod increased by 50% as from August onwards. This cost increase reflected the aggregate impact of import duties and anti-dumping tariffs as well as wire rod price evolutions and additional logistics costs related to the imports from other continents. Efforts were made to pass on the steep wire rod price increases to our customers and to create a more balanced

offering of domestically produced and imported tire cord from our manufacturing plants abroad.

In other steel wire markets, the average price of domestic wire rod increased about 30% compared with last year. Passing on the full price impact to our customers was not possible as we compete with import flows and integrated players (downstream integrated steel mills) there. The margins were, moreover, affected by continued weak demand in agricultural markets.

Both the underlying and reported EBIT amounted to € 25 million at a margin of 4%.

Capital expenditure (PP&E) was € 18 million in North America.

#### Latin America

In Latin America, consolidated sales were up +2.7% from last year.

Passed-on higher wire rod prices and other price-mix enhancements contributed +14.3% to the organic revenue growth. An overall weak economic environment in the region drove demand for our products down, resulting in an organic volume loss of -1.8% for the year. Consolidated sales were adversely impacted by the disposal effect (-6.1%) of the Sumaré integration within the JV partnership with ArcelorMittal since 1 July 2017, and by adverse currency movements (-3.7%).

Excluding currency effects, royalties from Brazilian joint ventures, and one-time elements, the underlying EBIT of our operations in Latin America slightly improved compared with last year. Including all elements, underlying EBIT decreased. This is mainly due to the lower positive net effect of one-time items in 2018 compared with 2017. Last year's records included the effect of the cancellation of the obligations under an onerous supply contract (€ +10 million) and the disposal effect of Sumaré (€ +12 million). The one-time element in 2018 regarded a change in a long-term benefit plan in Ecuador (€ +3.7 million). Royalties from the Brazilian joint ventures were higher in 2018, compared with last year (€ +5.4 million), while currency effects on underlying EBIT were € -1.9 million negative, year-on-year.

Including all elements, underlying EBIT decreased to € 43 million, reflecting a margin of 6.2%. Reported EBIT was significantly lower than last year: in 2017 the gain on the sale of 55.5% of the shares in the Sumaré plant in Brazil was included whereas in 2018 we incurred one-off expenses related to the closure of the Dramix® plant in Costa Rica.

Bekaert invested almost € 18 million in property, plant and equipment across the region, particularly in Chile.

Bekaert's combined sales increase in Latin America

(+5.7%) was from strong organic growth (+15.7%), largely offset by the translation impact of currency movements (-9.9%) which was mainly driven by the depreciation of the Brazilian Real compared with last year (-19.4% compared with the average rate of 2017).

#### Asia Pacific

Bekaert delivered +7.7% organic sales growth in Asia Pacific, driven by good volume growth (+5.7%) and the positive aggregate effect of passed-on wire rod price increases and price-mix (+2%). The robust growth of rubber reinforcement activities across the region was partly offset by weaker volumes in other sectors, among which the sawing wire activities in China and the steel wire activities in Malaysia. Adverse currency effects (-3.1%) drove top line growth down to +4.6%.

Underlying EBIT decreased to € 86 million at a margin of 7.2%. The margin decrease was the result of loss-making sawing wire activities (€ -9 million compared with € +21 million last year), the weak performance of our activities in Malaysia, and high start-up costs related to the expansion program in India. The rubber reinforcement business progressively improved the margin performance in the second half of the year, particularly in China and in India. This trend is visible in the segment's underlying EBIT for the second half.

Reported EBIT dropped to € 54 million due to the impairment of tangible and intangible assets related to sawing wire in China and the restructuring costs in Ipoh (Malaysia), which were partly offset by gains from the sale of land and buildings following the closures of the plants in Huizhou (China) and Shah Alam (Malaysia).

In anticipation of continued growth perspectives, Bekaert invested € 85 million in PP&E in the region in 2018, including expansion investments in China, India and Indonesia.

#### Bridon-Bekaert Ropes Group (BBRG)

Bridon-Bekaert Ropes Group (BBRG) achieved 5.5% organic sales growth, part of which was compensated by the impact of adverse currency movements (-3.7%) on the topline. Organic growth accelerated in the second half of 2018 (+8.4%) compared with the limited growth in the first half of the year (+2.7%) and was mainly driven by a positive price-mix evolution.

Underlying EBIT was  $\in$  -6.9 million for the year due to significant one-time adjustments without cash impact (including pension plan adjustments and obsolete stock write-offs) totaling  $\in$  -13.7 million. Excluding these adjustments, underlying EBIT would have reached  $\in$  6.8 million ( $\in$  +1.8 million in the first half of 2018 and  $\in$  +5 million in the second half).

Reported EBIT was € -20 million and included the impacts of one-off elements related to the restructuring in Brazil (€ -7 million) and other measures to turn around the business (€ -6 million).

In 2018, BBRG invested € 19 million in PP&E, about half of which in support of growing the advanced cords facilities in Belgium and China, and the other half in the ropes manufacturing sites worldwide.

Brett Simpson, Chief Executive Officer of Bridon-Bekaert Ropes Group, joined the company in September 2018 to take over the helm and lead the business forward. Brett Simpson, Australian, has significant business experience and expertise in leading and improving international businesses.

In October 2018 Bekaert completed the refinancing of the outstanding debt incurred by Bridon-Bekaert Ropes Group (BBRG) and the transaction related to the acquisition of the 33% equity share previously held by Ontario Teachers' in BBRG. Taking full control of BBRG will allow the business to accelerate the turnaround efforts and achieve its full potential.

#### Change in segment reporting as of 1 March 2019

In line with the organizational changes implemented on 1 March 2019, Bekaert's segment reporting has changed in 2019. The new segmentation will drive transparency into the business dynamics of each reporting unit and replace the previous geographic segmentation, to which Bridon-Bekaert Ropes Group had been added as a separate reporting segment. The Group's business units (BU) are characterized by BU-specific product and market profiles, industry trends, cost drivers, and technology needs tailored to specific industry requirements.

The new reporting segments are:

- Rubber Reinforcement
- This Business Unit serves industries that use tire cord, bead wire, hose reinforcement wire and conveyor belt reinforcement.
- Steel Wire Solutions

This Business Unit serves industrial, agricultural, consumer and construction markets with a broad range of steel wire products and solutions.

- Specialty Businesses
  - This Business Unit includes building products, fiber technologies, combustion technology and sawing wire.
- Bridon-Bekaert Ropes Group (BBRG)
   BBRG includes the ropes and advanced cords businesses.

### Financial review

Bekaert achieved +9% organic sales growth in 2018, reaching  $\in$  4.3 billion in consolidated revenue for the year. Part of this growth was offset by adverse currency movements (-2.5%) and divestments (-1.3%), resulting in a topline increase of +5%. Combined sales exceeded the  $\in$  5 billion mark for the first time in history and reflected an increase of +5.5% year-on-year.

Continued volatility of wire rod prices, trade tensions and policy changes, growing price pressure, higher than anticipated start-up costs related to various major expansion programs, and lossgenerating sawing wire activities have all been weighing on our margin performance in 2018. In addition, along with the measures we have been implementing to close certain loss-making entities and to turn around the profitability of other weaker performing businesses, we have posted a series of provisions and write-offs in the financial statements of 2018. Underlying EBIT reached € 210 million, representing a margin on sales of 4.9%.

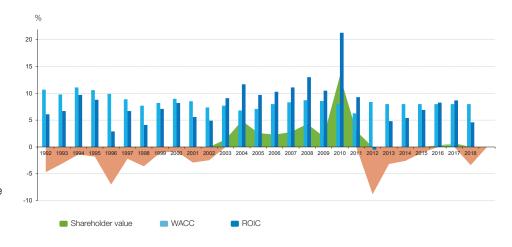

We have been successful in implementing actions to reduce the net debt position. Net debt was € 1 153 million at year-end 2018, down € -186 million from 30 June 2018 and unchanged from year-end 2017. Net debt on underlying EBITDA improved from 3.1 (30 June 2018) to 2.7 at the close of the year.

We are confident that our accelerated transformation drive and the improvement actions we are taking, will help us rebuild the underlying EBIT margin to above 7% over the medium term.

On 20 February 2019, Bekaert had a market capitalization of € 1.5 billion and a free float market capitalization of € 0.9 billion. The free float was 59.33% and the free float band 60%.

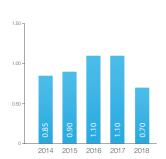

After having been an established value in the Euronext Brussels Star Index since its start in 1991, Bekaert was excluded from BEL20 as from 19 March 2018 and included in the BEL Mid Index of Euronext Brussels.

Bekaert, world market and technology leader in steel wire transformation and coating technologies, will continue to create value for its customers and shareholders. That is our focus. We are confident that our accelerated transformation drive and the improvement actions we are taking, will help us rebuild the underlying EBIT margin to above 7% over the medium term.

## Dividends

#### Policy on profit appropriation

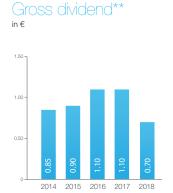

It is the policy of the Board of Directors to propose a profit appropriation to the General Meeting of Shareholders which, insofar as the profit permits, provides a stable or growing dividend while maintaining an adequate level of cash flow in the company for investment and self-financing in order to support growth. In practice, this means that the company seeks to maintain a pay-out ratio of around 40% of the result for the period attributable to equity holders of Bekaert, over the longer term.

#### Profit appropriation

The Board of Directors has proposed to the General Meeting of Shareholders held on 8 May 2019 to approve the distribution of a gross dividend of € 0.70 per share. The General Meeting of Shareholders approved the proposal.

## ALTERNATIVE PERFORMANCE MEASURES:

## definitions and reasons for use

Capital employed (CE)	Working capital + net intangible assets + net goodwill + net property, plant and equipment. The weighted average CE is weighted by the number of periods that an entity has contributed to the consolidated result.	Capital employed consists of the main balance sheet items that operating management can actively and effectively control to optimize its financial performance, and serves as the denominator of ROCE.
Capital ratio (financial autonomy)	Equity relative to total assets.	This ratio provides a measure of the extent to which the Group is equity-financed.
Combined figures	Sum of consolidated companies + 100% of joint ventures and associates after elimination of intercompany transactions (if any). Examples: sales, capital expenditure, number of employees.	In addition to Consolidated figures, which only comprise controlled companies, combined figures provide useful insights of the actual size and performance of the Group including its joint ventures and associates.
EBIT	Operating result (earnings before interest and taxation).	EBIT consists of the main income statement items that operating management can actively and effectively control to optimize its profitability, and a.o. serves as the numerator of ROCE and EBIT interest coverage.
EBIT – underlying	EBIT before operating income and expenses that are related to restructuring programs, impairment losses, business combinations, business disposals, environmental provisions or other events and transactions that have a material one-off effect that is not inherent to the business.	EBIT – underlying is presented to enhance the reader's understanding of the operating profitability before one-off items, as it provides a better basis for comparison and extrapolation.
EBITDA	Operating result (EBIT) + depreciation, amortization and impairment of assets + negative goodwill.	EBITDA provides a measure of operating profitability before non-cash effects of past investment decisions.
EBITDA – underlying	EBITDA before operating income and expenses that are related to restructuring programs, impairment losses, business combinations, business disposals, environmental provisions or other events and transactions that have a material one-off effect that is not inherent to the business.	EBITDA – underlying is presented to enhance the reader's understanding of the operating profitability before one-off items and non-cash effects of past investment decisions, as it provides a better basis for comparison and extrapolation.
EBIT interest coverage	Operating result (EBIT) divided by net interest expense.	The EBIT interest coverage provides a measure of the Group's capability to service its debt through its operating profitability.
Gearing	Net debt relative to equity.	Gearing is a measure of the Group's financial leverage and shows the extent to which its operations are funded by lenders versus shareholders.
Margin on sales	EBIT, EBIT-underlying, EBITDA and EBITDA-underlying on sales.	Each of these ratios provides a specific measure of operating profitability expressed as a percentage on sales.
Net capitalization	Net debt + equity.	Net capitalization is a measure of the Group's total financing from both lenders and shareholders.
Net debt	Interest-bearing debt net of current loans, non-current financial receivables and cash guarantees, short-term deposits, cash and cash equivalents.	Net debt is a measure of debt after deduction of financial assets that can be deployed to repay the gross debt.
Net debt on EBITDA	Net debt divided by EBITDA.	Net debt on EBITDA provides a measure of the Group's capability (expressed as a number of years) to repay its debt through its operating profitability.
Return on capital employed (ROCE)	Operating result (EBIT) relative to the weighted average capital employed.	ROCE provides a measure of the Group's operating profitability relative to the capital resources deployed and managed by operating management.
Return on equity (ROE)	Result for the period relative to average equity.	ROE provides a measure of the Group's net profitability relative to the capital resources provided by its shareholders.
Working capital (operating)	Inventories + trade receivables + bills of exchange received + advanced paid - trade payables - advances received - remuneration and social security payables - employment-related taxes.	Working capital includes all current assets and liabilities that operating management can actively and effectively control to optimize its financial performance. It represents the current component of capital employed.
